*Data Scientist with two years experience in
AI research seeks a full time opportunity in Paris*

Skills

Programming Skills:

Python C C++ SQL

Frameworks and Tools: PyTorch TensorFlow Keras OpenCV Sklearn Numpy Pandas Seaborn Matplotlib Hyperopt Docker AirFlow Celery Git Jenkins Jupyter

Deep Learning: Computer Vision for Medical Imaging, Object Re-Identification and Tracking, Autonomous Driving and Auto-Encoders.

Machine Learning:

- Support Vector Machines 📶
- Decision Trees, Random Forests, AdaBoost 📶
- K-means, Guassian Mixture Models 📶
- Naive Bayes 📶
- K-Nearest Neighbors 📶
- Polynomial Regression 📶
- Logistic Regression 📶
- Linear Regression 📶

Education

EPITA 2018

Computer Science, Data Science Major 5 years

Top 1 computer engineering master degree and most prized machine learning program in France.

Sejong University - South Korea 2015

Computer Science, Seoul 6 months

Exchange student program at Sejong University.

Languages

English: Fluent *lived in the US*

Spanish: Bilingual *hispanic origins*

French: Native *mother tongue*

Experience

SIEMENS US 📌 2019

Machine Learning Intern, Princeton 14 months

- Improved physician diagnosis of heart disease by creating a coronary calcium detector trained on CT scans using Unet with Pytorch.
- Improved patient's disease evaluation even further by classifying calcium in high and low risk arteries.
- Optimized model complexity to fit hospital needs by designing a faster approach using ResNet3D.
- Enhanced detection of mitral valve regurgitation by creating a blood flow dealiasing model using Unet trained on 3D color doppler data using Pytorch and C++.
- Automated the training of these algorithms using AirFlow workflows and Celery.

ENGIE 📌 2018

Machine Learning Intern, Paris 7 months

- Improved security of power-plants by designing a multi-camera vehicle re-identification and tracking system using Keras and TensorFlow.
- Implemented 2018 **state-of-the-art** solution and improved mean average precision by 6% by adapting a pedestrian re-id **paper** to vehicle tracking.
- Designed a framework to automatically re-train on different objects like pedestrian, faces, ect...
- Collaborated with the best researchers in the field after being invited to **ECCV** 2018.

SAP 📌 2016

Software Engineering Intern, Paris 5 months

- Improved the quality of an excel pluggin by designing an automatic testing platform using Python, SQL and Jenkins.

Projects

Autonomous RC Car 📌📺 2017

Python, Keras, OpenCV 12 months

- Built a remote-controlled car able to predict speed and steering angle in real-time from an embedded camera.
- Participated in tournaments and got 3rd at **IronCar** Summer 2018 and 1st at **RobotCars** Winter 2018.

Machine Learning Blog 📌 2020

PyTorch, Numpy, Pandas, Seaborn 3 months

- From scratch implementation of the most used algorithms in machine learning.
